October 19, 2001

Dear Sir or Madam,

I had the privilege of working with Mick Knutson on a Clinical Information system project for the University of Michigan Health System. Mick was on the UofM project from January 2001 until October 2001. Mick's responsibility in the project was to lead a team that designed and developed the application infrastructure for the web based project. He was also responsible to mentor some of his team members and function as an Architecture consultant helping us resolve several critical issues in the project.

Mick's expertise in the technology and his dedication towards the project helped us deliver the software within the time frame promised to the customer. Mick has a well refined/seasoned understanding of OO technologies, and proved invaluable as a J2EE expert. His knowledge of the entire software lifecycle, as well as the entire enterprise, allowed his services to be leveraged by everyone in the project.

I would have no hesitation or reservation in utilizing Mick's services again at any time. It is my opinion that Mick is highly reliable, well articulated and very dedicated to his work and co-workers.

Feel free to contact me if you need more information or have questions.
